Here's Your November, 2021 Instrumentation News

## Turn Down vs Flow Range for Meter Detection

Over the last few months, we have received several questions regarding two important metering topics; Flow Range and Turn Down. We've written a paper that may help you to understand, select, and specify the best meters for your applications.

Click the button below to access this paper.

## Are Your Chiller Projects Skating on Thin Ice?

Under controlled conditions refrigerant gases are safe and efficient. However, if not closely monitored and allowed to escape into the atmosphere, they can be extremely hazardous to both personnel safety and the health of our environment.

Reliable refrigerant gas monitoring is critical. Fortunately, there proven technologies available to building contractors and owners to detect and measure

leaks. (Note: This article is from the AEB archives.)

## Manufacturers Spotlight: Thermal Gas Systems

With experience extending back to the 1988 Montreal Protocol, no other fixed monitoring system manufacturer can claim a greater history dedicated to the research, manufacture, sales and service of refrigerant gas monitoring systems.

The Thermal Gas Systems Haloguard® product brand has come to mean proven reliability worldwide – designed and constructed to withstand tough mechanical room requirements.

## Contributing to a Healthy Planet

We are all stewards of our planet, and AEB Technologies is proud to do our part to help ensure a more sustainable environment. After searching for some time to find a meaningful way to contribute to

reforestation, we believe we have found one.

Team Trees is an organization with a goal of planting 30M trees by 2022 (\$1 = 1 Tree Planted). To date, they have planted over 9M trees with over \$23M raised so far. **Please join AEB** along with Elon Musk in donating to this amazing cause!
